Commercial Solar Makes Sense

Solar Link Australia Commercial Division has been leading the industry for over ten years in innovative solar energy solutions. We've seen first-hand the impact increasing electricity prices have had on the profit margins of Australian businesses. Over the last five years alone, the cost of power has increased at almost four times the rate of inflation and is set to keep rising.¹

Two of the main factors which will continue to drive up the cost of electricity are:

■ The cost of new electricity infrastructure required to replace ageing infrastructure and meet ever-increasing demand. (Australia currently needs to invest at least \$100 billion over the next decade to achieve this.)²

■ Increased operating costs for energy producers and retailers

The good news is that whilst energy costs have risen, the price of Solar Power hardware has reduced. Solar technology has seen a rapid acceleration in recent years and this has resulted in low cost, high efficiency products with robust reliability coming to market.

Generating your own power is now significantly cheaper than buying it from a power company. As a business, you will also receive the benefits from depreciation and GST claimback, making the entire project a cash positive scenario in many cases and fast paybacks with high return on investment are commonplace.

Delivering on all fronts

Lynbrook Shopping Village
Lynbrook VIC

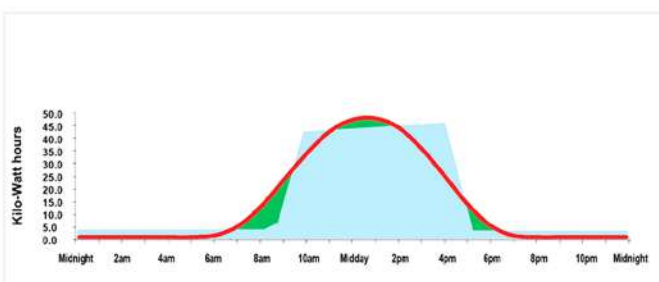

The experienced team at Solar Link Australia Commercial Division will prepare a detailed proposal that has:

1. Tailored System Design specifically for your application, energy usage and site specifics.
2. Our financial spreadsheet demonstrating your cashflow, break even and ROI figures for the project's life-cycle. If your business is registered for GST and you make a taxable profit, Solar Link Australia can help you:

- insulate your business against the future rising costs of electricity, and
- recover the GST component of your capital purchase on your next GST return, and
- take advantage of the expense deduction for depreciation.

Harness the sun's free energy to generate electricity for your business. Your Solar Solution can pay for itself in less than 3 years depending on your needs and your site specifics.

Average Daily Generation - 10kW Solar System 
 Typical Daily Consumption 
 Back to the Grid 

We know that first and foremost your system must make outstanding financial sense. Solar Link Australia Commercial Division backs this up with exceptional product and service that comes with outstanding warranty terms and our own in-house installation crews.

Your business can be reaping the rewards of free power from the sun. Not only is that good news for the environment, it's great news for your bottom line.

We walk with you every step of the way

At Solar Link Australia, we stand behind our work and systems 100% giving you the peace of mind that we'll always be there when you need us. We offer industry leading warranties on our Solar PV Systems. We can even offer extended warranties beyond our standard warranties of:

- Warranty – Solar Link Australia frames / mounting ----- **10 years**
- Warranty – Inverters ----- **5/10 years**
- Warranty – Solar Link Australia PV panels ----- **10 years**
- Panels provide a 25 year 80% performance Warranty (see Manufacturer's Warranty)

Funding your Solar Project

Your Solar PV System is a stable, long-term, expense saving asset which can be optimally geared through finance. For professional advice on available financing options, speak to us about our third-party finance solutions.

In many cases commercial Solar is now Cash Flow Positive even with finance.

What will Solar Link Australia do for you?

The Solar Link Australia team will design, assemble and install a quality solar solution which meets your specific business needs. We also take care of:

Power Utilities Scoping & Approval

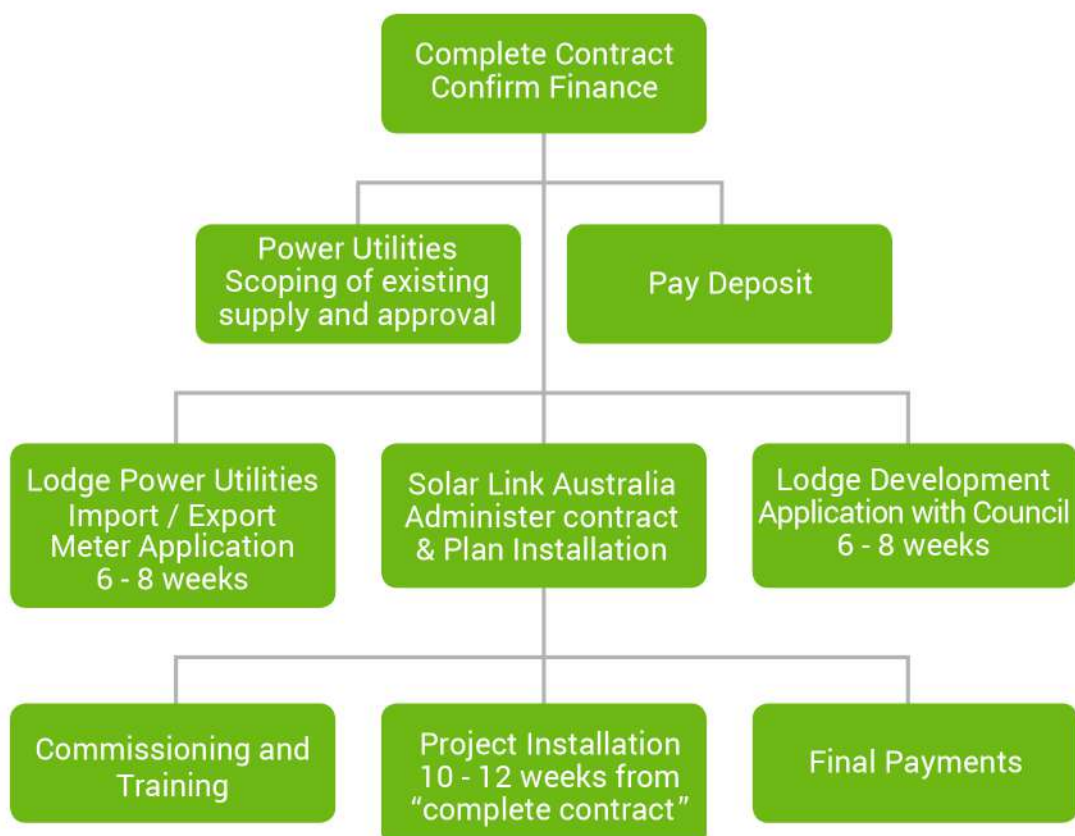

We'll confirm with Power Utilities that the Grid (lines, transformers, etc.) can cope with your power generation and that your proposed system complies with regulations

Power Utilities Import/Export Meters. We assist with co-ordinating the installation of your Import / Export meter

Monitoring of your system if chosen, so we can keep an eye on system performance at all times. You can also have access to this feature

Corporate Project Liaison Officer

Each Commercial Solar PV Contract is supported by a dedicated Project Officer who will "Walk with you every step of the way" – guaranteeing regular contact and updates

“ Solar Power Solutions – Design & Installation: Solar Link Australia is a Market Leader in Solar Photo Voltaic Supply and Installation. (EST 2005) ”

About Us

Solar Link Australia is committed to making renewable energy a major part of Australia's energy base. Our solar energy solutions are guaranteed to deliver significant financial saving to both a Suburban Residential Solar Installation or a Large Scale Solar Commercial Installation, whilst at the same time assisting in reducing your carbon footprint.

We are Specialists in Solar PV Solutions. **We have installed 10,000's of PV Modules throughout the country assisting thousands of families to reduce their bills. We have also installed numerous Commercial Scale Installations for well-known Companies & Charities like BP Australia, Australia Post, MITRE 10, The Salvation Army, Lynbrook Shopping Village & The Port of Sydney – to name just a few.**

Solar Link Australia offers a comprehensive range of Tier 1 Solar PV Bands. Our comprehensive sales knowledge and technical support along with our range of financial products allows us to assist you in selecting the right solar system as well as maintaining your solar system to get the most out of your solar investment.

Solar Link Australia has grown from humble beginnings to be one of Australia's leading Residential & Commercial Solar Power Supply & Installation Specialists. **We have performed in excess of 20,000 Metropolitan Solar Panel installations around the country as well as numerous Regional installations in townships like: Mackay, Mt Isa, Cairns, St George, Rockhampton, Gladstone, Emerald, Toowoomba, Roma, Hervey Bay, Gold Coast, Parkes, Orange, Dubbo, Nowra, Batemans Bay, Murwillumbah, Byron Bay, Shepparton, Mt Bulla, Bendigo, Ballarat, Smithton, Burnie, Whyalla, Alice Springs, GinGin, Albany ...** the list goes on!
